

Tariff group A¹ is available to customers supplied by low-voltage network (230/400 V):

- With a subscribed demand up to 69 kVA; or
- With a subscribed demand higher than 69 kVA if they are not included in tariff groups B and C.

Tariff Classes

A1 - General Tariff

A2 - Low Consumption Tariff

A3 - Social Welfare Tariff

A4 - Social Tariff

Charges

The charges under the tariff group A are based on:

Subscribed Demand² (in units of kVA)

- Maximum electric load available through the connection of supply as stated in the supply contract, and controlled by the meter size and protection device.

Consumption³ (in units of kWh)

- Total units of electricity consumed during the billing period.

Tariff Clause Adjustment⁴

- Adjustment in tariff to reflect fluctuation in energy production cost, that is fixed quarterly.

Government Tax⁵

- Monthly tax payable for the usage of electrical installation.

Remarks:

- 1 Decree-Law n.º 35/86/M of August 30.
- 2 Administrative Regulation n.º 11/2005 of July 18.
- 3 Executive Order n.º 23/2004 of August 9.
- 4 Administrative Regulation n.º 5/2007 of March 19.
- 5 The formula of tax calculation depends on the type of electrical installation (residential, commercial or industrial).
