

Shaping Macau into a smart city

In MSAR Government's Smart City Development Strategy and Construction in Main Areas, utilization of smart streetlights are suggested to collect environmental information. As a public utility managing streetlights, CEM will cooperate with the Government to complete the pilot installation of smart streetlights at Rua D. Belchior Carneiro, Rua de Luís Gonzaga Gomes, University of Macau Hengqin Campus and Avenida da Amizade in early 2019.

40th

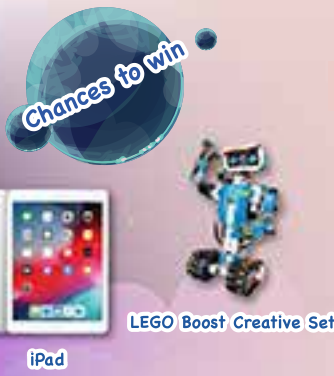

anniversary and expansion of Coloane Power Station

The Coloane Power Station has been serving Macau for 40 years, firmly supporting the city development and economic growth. Staying in line with the MSAR Government to create a low-carbon smart city, the Coloane Power Station will be expanded with a new smart power station with high efficiency and low emissions. By using natural gas, carbon emissions will be reduced up to 50%.

See you in Energy Fun Fair on 13 January

Join us on **13 January 2019 (Sunday) from 11am to 4:30pm** at **Tap Seac Square!** Grand prizes include **iPad**, **LEGO Boost Creative Set**, a limited edition sports water bottle, and many more plus game booths and talent shows. Children of age 16 and below are all welcome.

Keep your home safe and your energy cost down... while on vacation!

- Unplug unnecessary appliances to protect your home from fire hazard caused by short circuit, it also saves power as many appliances draw energy when they're turned off;
- Shut off the circuit breaker of the electric water heater to reduce energy consumption;
- Close the curtains to keep the sun's heat out.
