Macau's tariff is more competitive than most major cities in the world

We are committed to providing stable electricity tariffs to Macau citizens. Our basic tariff has not been increased for 23 consecutive years. The tariff in Macau is 27%, 42%, 70% and 124% lower than Bangkok, HK (CLP), Singapore and Tokyo respectively.

Note: Based on the average monthly residential power consumption of 430 kWh plus the government electricity subsidy of MOP200 in Q4 2019.

When power is suspended or restored during typhoons

When severe flooding occurs in low-lying areas during typhoons, CEM may need to suspend power supply. We will announce in 5 stages via CEM's website, Facebook page and WeChat: 1) alert as a reminder to get prepared; 2) warning of power suspension measures to be taken soon; 3) power suspended; 4) power restoration started; 5) power fully restored.

You can bind electricity bill or eService account in CEM WeChat (Chinese only) or register for Building Subscription service to receive push messages. Scan the QR codes now for binding or subscribing!

Don't miss our green lifestyle activities

We are gearing up to launch a series of activities for the second half of the year that promote green lifestyle. A wide variety of choices include electric cooking class, green workshop, photography course, children reading club etc. Like our Facebook page or follow our WeChat to stay tuned!

Smart Tips

The benefits of using smart power strip

- It can be set to turn off at an assigned time;
- It shuts off power to devices that go into standby mode;
- It can group several outlets, turning all of them on or off at the same time;
- It is fitted with motion detectors, cutting off the power if no movement is detected;
- It saves on your bills and protects the environment.
