

Electrical safety is everyone's concern

To raise public awareness about electrical safety and to educate on emergency handling during fires, CEM collaborated with the Macau Fire Services Bureau and several local organizations, to host a number of Electrical Safety Seminars from April to June. These seminars have attracted over 800 residents, industry insiders and professionals, fully demonstrating the community's concern for electrical safety and fire prevention. In addition, we also publish weekly posts on our Facebook page and WeChat, and ads on mFood, tikbee and buses. Stay tuned and remember that your safety comes first!

5% Energy Saving Action lucky draw

CEM is once again co-organizing the "Macau Energy Saving Activity" with Environmental Protection Bureau (DSPA) this year. From July to October 2025, residential customers who reduce their consumption by 5% or more compared with the same period last year, will enter the lucky draw upon registration. The activity also features an Eco Fun Carbon Points Rewarding Plan. By saving 5% or more electricity during the "5% Energy Saving Action Lucky Draw", DSPA "Eco Fun members" can receive 20 Eco Fun Carbon Points. A total of MOP100,000 worth of prizes are up for grabs. Don't miss the chance, register now!

Regulations and registration

Get ready when typhoon approaches

- Check the condition of windows and doors and repair immediately if they are damaged;
- Prepare an eco-friendly rechargeable or hand crank flashlight and an emergency kit;
- Do not place appliances near windows and remove items from the balcony;
- Stay away from low-lying areas such as basements or underground car parks;
- Turn off the main switchboard immediately if there is flooding occurred indoor.

Follow CEM's Facebook to receive updated power supply information during typhoons.

Stay cool this summer!

- ✓ Close blinds and curtains during the day to keep the interior cool;
- ✓ Turn on an electric fan while using the air conditioner to speed up cooling without having to lower the AC temperature;
- ✓ Set to a higher temperature of the air conditioners at night;
- ✓ Service air conditioners regularly to maintain efficiency and air quality.

You can also track your energy consumption pattern with CEM APP and identify areas where you can save energy!
