

## Install your own EV chargers

CEM has installed EV charging stations at 200 parking spaces in public car parks and streets across Macau. Although it is convenient for EV owners to find them, with the rise in popularity of EVs, it is best to install medium/slow chargers in private parking spaces.

Using your own chargers is advantageous. Besides being able to charge anytime, you can also slow down the aging of EV batteries by using medium/slow chargers. In addition, charging cost will be lower than the public charging fee, which will be implemented in the future.

## Nurturing the young generation

CEM is devoted to support the youngsters to enhance their competence and facilitate their future integration into the workforce by working with different entities to offer internship programs. This year for the first time we partnered with the Bosco Youth Service Network to provide one-to-one on-the-job training to youngsters with special education needs to experience the working atmosphere. We also offer our full support to the Macau Labor Affairs Bureau's "Overcome the difficulties caused by epidemic and create better job prospects" internship program for this year's university graduates.

## CEM achieves certification on greenhouse gas emissions and removals

Protecting the environment is always CEM's priority for a sustainable future in Macau. In the global pursuit of combating climate change, we completed the external certification audit of 2019 for ISO 14064-1 (2018) Greenhouse Gas Emissions and Removals Quantification and Reporting as per its ISO guidelines and requirements in June, with certification awarded in September 2020.

## Smart Tips

### Smart plugs can make your life easier and safer

- Turn your appliances on/off remotely at any time using your smartphone or tablet;
- Prevent devices from wasting energy when they're not in use, thus saving on your bills;
- Program it to cook your meals or prepare your tea/coffee the moment you need them;
- Monitor and shut down your kids' consoles and internet usage during set hours.
